

Contribute to Sui Repositories

This page describes how to contribute to Sui, and provides additional information about participating in the Sui community.

To connect with the Sui community, join our [Discord](#).

To report an issue with Sui, [create an issue](#) in the GitHub repo. Click Get started to open a template for the type of issue to create.

To contribute to Sui source code or documentation, you need only a GitHub account. You can commit updates and then submit a PR directly from the Github website, or create a fork of the repo to your local environment and use your favorite tools to make changes. Always submit PRs to the main branch.

See [Sui Environment Setup](#) for instructions on forking the Sui repository, if necessary.

The Sui Network is an open-source, decentralized, and permissionless protocol that welcomes community contributions. If you have an idea regarding a core protocol upgrade, the best way to make your voice heard is via submitting a Sui Improvement Proposal (SIP). For more information on SIPs, see [Contribute to Sui through SIPs](#).
